**CARBON REDUCTION PLAN GUIDANCE**

# Carbon Reduction Plan

Supplier name: Networkology.....

Publication date: 30/11/2022.....

## **Commitment to achieving Net Zero**

Networkology is committed to achieving Net Zero emissions by 2050.

## **Baseline Emissions Footprint**

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

<b>Baseline Year: 2021</b>	
<b>Additional Details relating to the Baseline Emissions calculations.</b>	
<b>Baseline year emissions:</b>	
<b>EMISSIONS</b>	<b>TOTAL (tCO<sub>2</sub>e)</b>
<b>Scope 1</b>	<b>0</b>
<b>Scope 2</b>	<b>0.75</b>
<b>Scope 3 (Included Sources)</b>	<b>3,36 (business travel, hotels and events)</b>
<b>Total Emissions</b>	<b>4.11</b>

*Networkology is a remote first company and does not own or lease any buildings or vehicles, which is why Scope 1 above is 0.*

## Current Emissions Reporting

Reporting Year: 2022	
EMISSIONS	TOTAL (tCO <sub>2</sub> e)
Scope 1	0
Scope 2	0
Scope 3 (Included Sources)	26.52 (Total organisation Energy usage, WFH, business travel, commuting, hotels and events)
<b>Total Emissions</b>	<b>26.52</b>

*Networkology is a remote first company and does not own or lease any buildings or vehicles, which is why Scope 1 and 2 above is 0.*

## Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

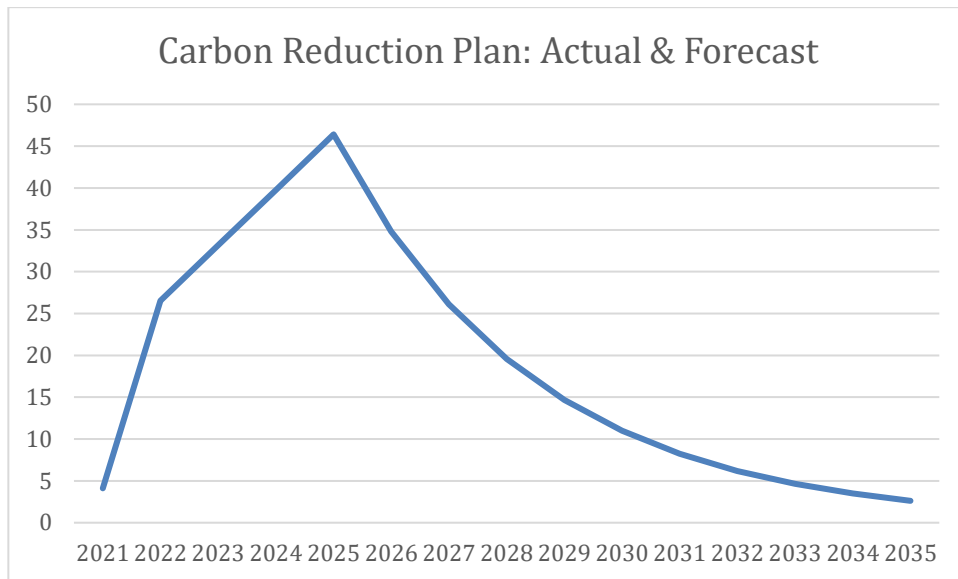

We project that carbon emissions will increase over the next three years to 46.41t CO<sub>2</sub>e by 2025 which is an increase of 75%. This is due to the continued rapid growth of the business as we execute an expansion plan.

Whilst we are in this growth phase we are committed to offsetting at least 200% of all carbon emissions, and support a number of climate funds.

Post 2025 we then see our carbon emissions reducing by 25% each year to see total emissions of 11.01t in 2030 and 2.61t by 2035.

This will be achieved through green energies and a significant reduction in travel through greater use of technology. We will remain committed to our offsetting too throughout this period.

Progress against these targets can be seen in the graph below:

## Carbon Reduction Projects

### Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline. The carbon emission reduction achieved by these schemes equate to 13.42 tCO<sub>2</sub>e, a 399%ge reduction against the 2021 baseline. However, due to the significant company growth this scheme has been overshadowed by the new emissions from the larger company size and through the different method in which the government now measures employees that work from home.

We are an ISO 14001 company and our staff are well educated on waste disposal and energy saving.

## Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard<sup>1</sup> and uses the appropriate Government emission conversion factors for greenhouse gas company reporting<sup>2</sup>.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard<sup>3</sup>.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

### Signed on behalf of the Supplier:

*S. Wallington*.....
