

ALLEGRO PACKETS

NETWORK ANALYSIS & DIAGNOSTIC DEVICES

Networkology have partnered up with Allegro Packets for easy network troubleshooting. The Allegro Packets Multimeter products are powerful, easy-to-use network analysis and diagnostics devices which are deployed by network administrators around the world to analyse network traffic in real-time, whether the event to be analysed is current or in the past. Network Multimeters provide the ability to quickly and efficiently analyse your network to find problems, bottlenecks, and packet loss.

POWERFUL NETWORK TROUBLESHOOTING AT YOUR FINGERTIPS

Allegro Network Multimeters use high performance, powerful software algorithms to analyse load peaks and disturbances. At the same time, they act as powerful network monitoring tools to ensure high network quality.

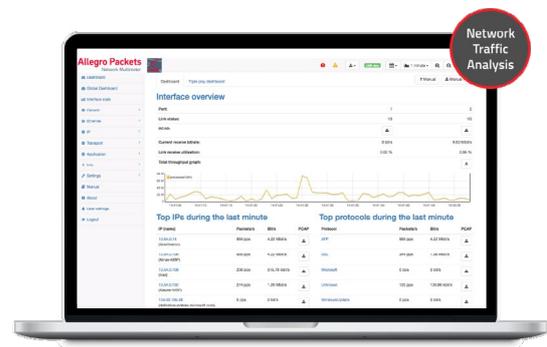

Allegro Packets devices range from small and lightweight units to larger rack mounted devices depending on your requirement. The former is easily integrated at any point in the network, and therefore can be used in a wider variety of locations and site-types. These low-cost yet extremely powerful network analysis devices make troubleshooting quick and easy.

ALLEGRO MULTIMETERS BENEFITS

The benefits of Allot's ACG & SSG, delivering powerful capabilities:

- **Easy operation:** network problems can be detected within a few clicks.
- **High-speed** consistent performance.
- **Ultra-portable models** of the Allegro Network Multimeters are small, lightweight and require no configuration.
- **Full-stack data analysis** at your fingertips via the web-interface.
- A wide range of multimeter product types to choose from.

ALLEGRO MULTIMETER PRODUCT RANGE

There are a wide range of Allegro Multimeters to choose from. Download the performance overview table to view a comparison of all Allegro Packets appliances and their specifications.
