

ALLOT

TRAFFIC CONTROL MADE EASY

As trusted Value-Added Delivery Partner, Networkology are proud to offer an array of Allot products to help you identify and mitigate issues. This is achieved by monitoring and controlling application and network performance to prioritise your business priorities. Allot's Traffic Intelligence and Assurance Platform, powered by Application Control Gateway (ACG), Secure Service Gateway (SSG), or Service Gateway (SG) product lines, assures an optimised Digital Experience for your end-users whilst achieving a low TCO.

ALLOT ACG & SSG: THE PERFECT PACKETSHAPER REPLACEMENT

As a strong testament to Allot as the market leader in Application Control and Digital Experience Monitoring (DEM), the company was chosen by Broadcom as the recommended vendor to offer a transition path from the discontinued PacketShaper line of products.

If you have an existing Packetshaper installation that needs refreshing, then Networkology can help facilitate a smooth transition to the latest generation of traffic management technology.

NETWORK TRAFFIC MANAGEMENT & MONITORING

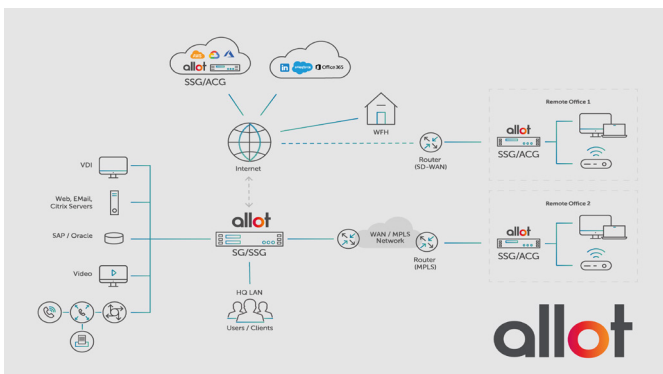

Network intelligence is all about understanding how your business applications are performing and how your end users are behaving so you can create additional value. This ensure consistent, reliable performance of all your important applications.

Allot network intelligence provides a consolidated view of the corporate network so that network & security teams can act precisely and quickly to assure IT operations, network service, and application QoE.

THE BENEFITS OF ALLOT'S TRAFFIC MONITORING
