

NETWORK DESIGN & IMPLEMENTATION

Whatever your need, be it a new network requirement, technology refresh or having an existing complex and ageing data centre migrated to the cloud, our security cleared engineers can assist.

Our highly qualified consultants will produce detailed design documentation that is based upon the latest architectural processes and industry standards. We reference best-practices on areas such as high availability, reliability, resilience, security, performance and manageability. We have the knowledge, ability and the experience to provide bespoke solutions to a wide variety of clients. You can be sure that your entire project will be professionally managed with uncompromising levels of quality, service and safety.

UNPARALLED EXPERIENCE

Our reputation speaks for itself:

- Decades of experience in public-sector network design
- Delivering on the small scale as well as huge global projects
- Vendor agnostic approach ensures quality & value

DELIVERING SECURELY

Secure environments are our speciality:

- Specialists in highly regulated/secure environments
- In-house security cleared staff & consultants
- ISO27K & Cyber Essentials Certified
- Extensive knowledge of MOD processes & standards

UNCOMPROMISING QUALITY

Delivering excellence regardless of size:

- High quality detailed designs & documentation
- Bespoke design & implementation processes
- Project & Service Management available
