

TECHNICAL ASSESSMENT

ASSESSING THE HEALTH OF YOUR PLATFORMS

Networkology's Data Solutions team is passionate about helping our customers get the most out of their Splunk, Cribl and C3M platforms. Our technical assessment and health check service provides you with a qualified, experienced Consultant to analyse your platform and identify areas of best practice or recommendations for future improvement. At the end of the Technical Assessment, we provide a report with resources and steps to help any implementation or remediation work.

WHAT OUR TECHNICAL ASSESSMENT COVERS

Our Technical Assessment will typically look to cover the following aspects:

1. License Ingestion
2. Architecture and Deployment
3. Platform versioning and support
4. Search and Platform Performance

We can tailor a technical assessment to meet your needs if there are other areas of specific focus.

SMALL PLATFORM TECHNICAL ASSESSMENT

2 day engagement: Day 1 (the assessment) can be conducted on-site or remotely, capturing the necessary information and platform data. Day 2 is performed off-site, using the data captured to produce a report.

MEDIUM/LARGE PLATFORM TECHNICAL ASSESSMENT

3-5 day engagement, depending on the size of your environment. Day 1-3 is similar to the small assessment process, taking a more in-depth review of architecture best practices and performance. This assessment can also be conducted on-site or remotely. The final 1-2 days of the assessment process are dedicated to writing up the findings and provide a report.

Our Consultant will schedule a call after the Assessment is complete and report is issued, to walk through the findings and answer any questions you may have.

COST OF ASSESSMENT

- Small Platform Assessment - **£1000** (€1250)
- Medium/Large Platform Assessment - **£2000** (€2500)

(Cost of the Assessment can be offset against any Professional Services purchased in blocks of 10 or more days)
