TELTONIKA NETWORKS

GLOBAL PROVIDER OF CELLULAR EQUIPMENT

Networkology have partnered with the rapidly growing technology company Teltonika Networks. Teltonika Networks has a proven track record of rapid growth within professional and industrial cellular connectivity market segments, currently offering a wide and ever-evolving product portfolio, consisting of modems, gateways, routers, switches, and IoT platforms. All products have a focus on delivering the best reliability possible, assuring the highest level of security and offering quick and easy deployment.

MISSION CRITICAL COMMUNICATION WITH TELTONIKA CELLULAR ROUTERS

Teltonika Networks are most famous for their compact cellular routers, which are equipped with a variety of wireless and wired connectivity options and technologies including 4G, which make them an essential tool to connect people, machines and infrastructure across many market sectors.

The Teltonika Networks RUT series is engineered to be deployed easily, providing mission critical cellular communication in harsh environments and challenging connectivity scenarios.

Powered by RutOS, Teltonika routers provide excellent user experience and easy deployment, thanks to the intuitive interface provided. RutOS is a unified operating system based on OpenWrt used by all Teltonika Networks devices and has become one of the most functional router operating systems in the market.

This system enables clients to cut their cost on engineer training while implementing new devices. Moreover, it empowers flexibility when migrating between different devices and platforms.

RELIABLE & SCALABLE TELTONIKA MODEMS

Industrial cellular modems are the most cost-efficient and scalable method to provide reliable connectivity in industrial networking applications. Large amount of legacy and Industrial IoT infrastructure worldwide requires different methods of connectivity. Robust Industrial Cellular Modems from Teltonika provide numerous cellular connectivity options, ranging from 2G (EGPRS) to 4G LTE Cat 1, LTE Cat-M1 and NB-IoT.

TELTONIKA INDUSTRIAL SWITCHES

Teltonika Networks provides a range of robust, industrial Ethernet Switches. They feature industrial-grade reliability, network redundancy, security and easy management. Switches have multiple mounting options for faster and easier installations.

RUT360 - SMALL IN SIZE, BIG IN PERFORMANCE!

TELTONIKA'S REMOTE MANAGEMENT SYSTEM

Teltonika Networks Remote Management System (RMS) is an all-in-one user-friendly IoT platform providing a smart way to stay on top of your whole connected solution completely remotely, securely, and reliably.

It is a powerful solution for remote access and management allowing users to save time and operational costs while being flexible and easy to use.

With RMS you can manage compatible Teltonika Networks routers and gateways, reach remote devices, utilise the power of remote desktop access and configure secure VPN tunnels with just a few clicks.

BENEFITS & FEATURES:

- Real-time alert system
- Activity reports
- Regular updates and User friendly
- Compatible with various OS
- Device multi-configuration
- No public IP required
- Remotely access non-Teltonika devices
- Efficient large scale network management
- Security first
