DESCRIPTION

This 40G-SR compatible QSFP+ transceiver provides 40GBASE-SR throughput up to 150m over multi-mode fiber (MMF) using a wavelength of 850nm via an MPO/MTP connector. It is guaranteed to be 100% compatible with the host OEM switch, router or network interface card (NIC).

This easy to install, hot swappable transceiver has been programmed, uniquely serialized and application tested to ensure that it will initialize and perform identically to the OEM Transceiver. Digital optical monitoring (DOM) support is also present to allow access to real-time operating parameters.

We stand behind the quality of our products and proudly offer a lifetime warranty.
